

# KRITI YADAV

## Senior Technical Business Analyst | AI & Data Systems Delivery | Melbourne, Australia

+61 478 481 081 | [kritiyadav9993@gmail.com](mailto:kritiyadav9993@gmail.com) | [linkedin.com/in/kriti-yadav-data-science](https://www.linkedin.com/in/kriti-yadav-data-science) | [github.com/Kriti-Data-Business](https://github.com/Kriti-Data-Business) |  
Portfolio: [kriti-data-business.github.io/portfolio-data-science](https://kriti-data-business.github.io/portfolio-data-science) | <https://medium.com/@datasciencebusiness>  
*Graduate Visa (485) from July 2026 full unrestricted working rights*

## PROFESSIONAL SUMMARY

Technical Business Analyst and Data Scientist with 4.5+ years delivering AI, analytics, and data platform projects across government, financial services, and global enterprise. Proven across the full BA lifecycle-requirements elicitation, BRD/FRD authoring, process mapping (BPMN), UAT coordination, and stakeholder sign-off at C-suite level. Distinctive edge: the ability to then build and govern the ML system those requirements define, enabling faster, more credible delivery cycles. Demonstrated at TIO, Axtria, and WPP through consistent end-to-end ownership from workshop to production. Live shipped AI products on GCP and Azure. Completing Master of Data Science at RMIT (June 2026).

## CORE CAPABILITIES

Business Analysis: Requirements Elicitation & Workshop Facilitation | BRD/FRD Authoring | User Stories & Acceptance Criteria | As-Is/To-Be Process Mapping (BPMN, Visio, Miro) | Gap Analysis & Options Assessment | Solution Architecture Recommendation | UAT Design, Coordination & Sign-off | Stakeholder Engagement & Executive Reporting | Business Case Development | Change Impact Analysis | Agile/SAFe (Jira, Confluence)  
Data Science & Technical Delivery: Python (pandas, scikit-learn, PySpark) | Advanced SQL (MySQL, PostgreSQL, Databricks) | ML Pipeline Design & Deployment (Azure ML, GCP) | NLP, LLM Systems & RAG Architecture | ETL Pipeline Architecture & Automation | A/B Testing & Statistical Inference | Power BI (Master Certified) | Tableau | Data Governance & Quality Frameworks | APRA/OAIC/ACMA Compliance

## PROFESSIONAL EXPERIENCE

### Data Scientist & Business Analyst (Intern)

Mar 2026-Jun 2026

*Telecommunications Industry Ombudsman (TIO) | Melbourne | Government*

- Led requirements elicitation workshops with DA leads, operations, and legal; authored data requirements specifications, business rules documentation, and acceptance criteria; assessed and recommended solution architecture against regulatory constraints-owned the full requirements-to-production cycle.
- Sole-built a production ML pipeline across 12 weeks: DAX-driven data discovery, stratified sampling (3,500-case training set with keyword quota and inverse-frequency weighting), multi-label OvR classifier with DistilBERT embeddings, per-tag threshold tuning, and Azure ML deployment. Engineered automated retraining feedback loop with anomaly alerting and QA pipelines.
- Designed a multi-page Power BI dashboard surfacing AI-driven triage insights to operations and senior leadership, with automated narratives and drilldown capability. | [Demo](#)

### Data Science Researcher

Jun 2025-Present

*RMIT University | Melbourne | LLM Prompt Design & Benchmarking | Github*

- Designed a production-grade two-phase LLM benchmarking framework across 1,055+ coding tasks (LeetCode/AtCoder) with 8-layer output validation, automated failure recovery, and append-safe infrastructure supporting multi-day runs.
- Applied three-way ANOVA, chi-square, and pairwise Fisher exact tests across Prompt x Difficulty x Platform dimensions; identified previously unreported platform x difficulty interaction effect; translated findings into design principles for non-technical stakeholders. Preparing for workshop paper submission.

### Senior Data Scientist & Analytics BA

May 2022-Jul 2024

*Axtria Inc | Global Pharma & Healthcare Data Science Consultancy | Fortune 500 clients*

- Led requirements elicitation and authored BRDs, functional specifications, and options analyses for 12+ concurrent projects across US, India, and APAC client teams; managed delivery from brief to C-suite sign-off.
- Designed, built, and deployed an NLP-powered Next Best Action engine (XGBoost, LSTM/RNN, Reinforcement Learning) replacing static promotion rules with journey-aware personalisation-8.3% revenue uplift across brand- and region-specific pipelines.

- Led Marketing Mix Modelling across 5+ integrated media channels; engineered PySpark + SQL ETL pipelines-66% latency reduction, zero critical data breaches across 12+ concurrent projects.
- Coordinated UAT across US, India, and APAC client teams; designed and maintained Power BI/Tableau dashboards for 500+ users across 20+ reports; translated ML outputs into executive narratives.
- Designed and delivered SQL and analytics training curriculum for 100+ analysts across cross-functional teams.

## Automation Analyst & Data BA

Sep 2020-May 2022

Wunderman Thompson MSC (WPP) | Ford (global e-commerce) & Pfizer (7 countries)

- Mapped as-is/to-be processes across global portfolios using BPMN; authored to-be specifications for automated ETL pipelines-90% reduction in manual workflows, >60% error reduction.
- Owned design-through-deployment of ETL environments for Ford's global e-commerce footprint and Pfizer's 7-country rollouts; maintained >99% data accuracy; accelerated client decision cycles by >20%.
- Delivered A/B testing, segmentation, and purchasing behaviour insights; designed executive Power BI dashboards with multi-level KPI drilldowns and real-time monitoring for C-level stakeholders.

## SELECTED PROJECTS & DELIVERED SOLUTIONS

### CGAI-Enterprise AI Governance Platform

June 2026-Present

Product Owner | BA | Data Scientist | GCP | Gemini 2.0 RAG | APRA/OAIC/ACMA | [github.com/Kriti-Data-Business/CGAI](https://github.com/Kriti-Data-Business/CGAI) | [Pitch](#)

- Conceived, scoped, built, and shipped from zero to live GCP deployment acting simultaneously as product owner, BA, and data scientist. Defined APRA/OAIC/ACMA regulatory requirements, assessed architecture options, and delivered a production system with guardrail enforcement, multi-tenant security, audit evidence generation, and a compliance copilot powered by Gemini 2.0 RAG.

### Retail Campaign Uplift Analyser

2025

Python | SQL | Power BI | A/B Testing | Statistical Inference | [Demo](#)

- End-to-end retail media measurement pipeline across 4 channels and 5,000 customers. Applied Welch's t-test, Cohen's d, 95% CIs, and conducted cross-validation-proved pre/post methodology overstated true lift by 25pp, surfacing \$2.05M incremental revenue at 8.7x blended ROAS. Four-tab supplier-facing Power BI dashboard with automated insight narratives.

### Finance Fund Manager x Investor Insights Chatbot

2025-Present

NLP | Sentiment Analysis | AWS | RMIT x Vanguard | [Github](#)

- Secure NLP-driven chatbot analysing fund manager and investor communications using sentiment analysis and sequence modelling; multi-layer AWS security architecture with compliant financial data pipelines.

## EDUCATION

### Master of Data Science

Jul 2024-Jun 2026

RMIT University | Melbourne | High Distinctions: Computational ML, Applied Analytics, Data Wrangling

### Bachelor of Technology-Computer Science

2016-2020

The NorthCap University | India

## ACHIEVEMENTS & CERTIFICATIONS

- GDG Melbourne x Google DeepMind AI Sprint Top 9 team: Local Pulse dynamic intelligence for Australia's 2.4 million small businesses using Google Ai studio | [Demo](#)
- RMIT GenAI Hackathon-Best Team Melbourne | Top 3 Globally: Shipped a production-ready AI platform (FastAPI + AWS Bedrock + Hugging Face) with AES-GCM encryption, RBAC, adversarial testing, and real-time monitoring under competitive conditions.
- SQL Trainer, Axtria: Designed and delivered SQL and analytics curriculum for 100+ analysts.
- Certifications: Power BI Master Certified | AWS Machine Learning & Decision Making | UiPath RPA Developer | Advanced MySQL | Stanford Algorithms | Project Management | Python Automation |
